## THE CLARENCE ENTRANCE.

## CHIEF ENGINEER'S EVIDENCE.

## SHALLOWNESS OF THE BAR.

Before the Public Works Committee yesterday, Mr. R. H. De Burgh, chief engineer of the Public Works Department, gave evidence regarding the expediency of constructing a breakwater on the northern side of the entrance to the Clarence River.

Mr. De Burgh stated that at the end of John Cooke's scheme for a northern and southern breakwater at the Clarence the engineer witnesses were practically unanimous in their advocacy of the project. While the inquiry was in progress the captain of the steamer Portia submitted evidence relative to the success of powerful dredging operations at Durban, South Africa. In consequence of that Mr. Wade (then chief engineer) was deputed to inspect and report on the Durban system. On his return he expressed the opinion that while favouring the construction of the breakwater, satisfactory results could be obtained by dredging at a smaller cost. The committee then, after taking evidence as to the river trade, decided to adopt the more expensive method. Since then this work had been in Mr. De Burgh's hands. In the last couple of years he had not been able to make the larks crossing. In fact, he would add that, even with the amount of dredging carried out by Mr. Wade, he could not have kept the river suitable for navigation.

The witness, continuing, said that in the Clarence there were two very serious troubles. One was the lack of water on the bar, and the other, the greater trouble, was the lack of water and the tortuous channel at the larks crossing. For the two years ended June, 1910, and under the 2,000 tons of dredging carried out by Mr. Wade, there was only 9 ft of water there. Recently the coastal steamer Orana had steamed into the river, but was unable to pass the larks crossing.

The chief engineer also submitted figures, showing that 2,000 tons of dredging carried out by Mr. Wade had been spent on the dredging. He explained the reason for his suggestion that the breakwater should be constructed at the mouth of the river. The success of the scheme would provide adequate protection to the river. The success of the scheme would provide adequate protection to the river.

The chairman asked the witness what the cost of dredging would be in the event of the Government carrying out the breakwater scheme, which would cost about 10,000 per annum.

Mr. De Burgh replied that should a flood occur the dredging would be very materially increased. He estimated that the cost of the present expenditure.

CRIPPLED BY TERRIBLE ULCERS.

ORDINARY REMEDIES MADE HIM WORSE.

ZAM-BUK HEALS IN A WONDERFUL MANNER.

My husband, who is a driver, knocked his legs while he was troubled with various ulcers," says Mrs. M. Elliott, of 12 Ballis-street, North Melbourne, Victoria. "Soon after he was suffering with ulcers from which his legs became inflamed and swollen. The pain was terrible. He got worse, and at last had to give up work and lay up. For over three weeks he was in bed, suffering with the ulcers. We tried many remedies, but nothing brought him any relief. In fact, he became worse, and the pain increased. Then I commenced using Zam-Buk, carefully dressing the ulcers with this grand balm. The results were pleasing. For Zam-Buk was very soothing, and eased the awful pain almost as soon as applied. By continuing applications of Zam-Buk the ulcers and swellings were quickly reduced, and the pain was brought under control. Gradually the sores healed one by one, until his legs were completely cured, and he was able to resume work and get about as usual. Now, should he knock his legs, the prompt use of Zam-Buk prevents further complications."

My children during the winter months suffered from chilblains on their toes. However, I am glad to say Zam-Buk reduced the swelling in a very little time."

Accidents will happen, and a lot of pain should always be kept handy. Sold by all chemists and stores at 6d and 1s 6d per pot. Every home needs Zam-Buk—Advt.

## BANKRUPTCY COURT.

(Before Mr. Justice Higgins, Chief Judge.)

## THE TOWNHALL CASE.

The matter of the application of Mr. W. H. Palmer, official assignee of the bankrupt estate of Albert Ambrose Schwartz, of Townhall, for certain orders against the respondent, Frederick Charles Schwartz, upon whom judgment had been delivered, was mentioned.

His Honor declared there was no partnership in respect of the Brisbane-street properties, and directed that the usual partnership accounts should be taken before the Registrar. He decided that as the official assignee had partly succeeded and partly failed, the proper course was to make an order as to costs. Having looked into the case, his Honor found he could not order the respondent to pay any money into court at present, although the result might be different after the taking of the accounts.

(Before the Registrar, Mr. F. H. Salebury.)

## MOTIONS FOR RELEASE.

Mr. John Henry Jurd, Mr. G. H. Turner, appeared for the bankrupt, and on his application the matter was adjourned to February 25, 1912.

Mr. Edwin Charles Capitt. On the application of Mr. M. A. H. Fitzhugh, the matter was adjourned to February 25, 1912.

Mr. John Bishop, jun. Mr. Cowan appeared as counsel for the bankrupt, and on his application the matter was adjourned to March 6, 1912.

Mr. Arthur Gough. Mr. Madocks Cohen appeared for the bankrupt. The Registrar found that the bankrupt had been unable to pay any money into court at present, and suspended the operation of the order of discharge for 12 months.

## MEETINGS AND EXAMINATIONS.

Mr. Denis Michael Cregan. On the application of the official assignee, the matter was adjourned to be held before the District Registrar at Germantown.

Mr. George Shirley Loyd. Bankrupt was examined by the official assignee, and by Mr. Schrader for a proved creditor. The meeting closed, and the public examination was declared concluded.

## DISTRICT COURT.

(Before Judge Murray.)

## A TIMBER TRANSACTION.

Mr. James, instructed by Mr. R. H. Shorter, appeared for the plaintiff, William Nicholls, of No. 1 New-street, Annandale, timber merchant; and Mr. T. Rawlinson for the defendant, John A. Deane and E. Thornton, trading as Deane and Thornton, of 42A Castlereagh-street, city, contractors.

Defendants were sued by plaintiff for £114, which was alleged to be due in respect of timber delivered to defendants.

The sum of £210 in satisfaction of the claim was paid into court by defendants, who denied liability as alleged.

His Honor said he would visit the premises in Pitt-street before giving his decision.

## AN ASSAULT MATTER.

AT THE TELEPHONE.

Mr. Curlew, instructed by Mr. W. A. Freeman, appeared for the plaintiff, Westworth Armstrong, of Bond-street, Newtown, and Mr. E. R. Abigail for the defendant, Frederick Johnston, of Glen-road, Watson's Bay. Plaintiff sued defendant for £25 damages, for an alleged assault, whereby he was "wounded and injured, and his clothes spoiled and damaged." Defendant pleaded that he committed the alleged assault in self-defence.

Plaintiff's case was that the alleged assault occurred whilst he was endeavouring to raise Central. He had been at the telephone for about half an hour in an unsuccessful effort, when the lines were suddenly cut. A woman, who had been telephoning, took place between plaintiff and the person who had "cut in." Plaintiff recognised the voice of the other person as defendant's. Whilst plaintiff was still trying to raise Central, the woman, who he alleged, struck him on the head with the receiver in his hand.

As a result of the alleged assault plaintiff's eye was closed, a tooth injured, and his nose and lip cut.

Defendant's launch proprietor, said he had business with the office at which plaintiff was employed. He had occasion to ring up for certain orders, and subsequently secured a connection. Defendant had a conversation with plaintiff on the telephone, during which the plaintiff used language which was both uncomplimentary and insulting to plaintiff.

Subsequently defendant walked to the office, where he met plaintiff, whom he asked what he meant by using the terms he used. Plaintiff, he alleged, made a blow, which he (defendant) avoided. Defendant then retaliated by hitting plaintiff twice.

His Honor found for the plaintiff for £10.

## COMMONWEALTH ARBITRATION COURT.

(Before Mr. Justice Higgins.)

## DEMANDS OF SHIP'S OFFICERS.

Evidence was continued in the matter of the industrial dispute between the Merchant Service Guild, claimants, and the Commonwealth Steamship Owners' Association and others, respondents.

In respect to the claims of the guild, evidence was given as to hours and conditions of the work of the officers ruling in Tasmania.

The hearing of the matter was adjourned to Melbourne, and leave was granted to the Adelaide respondents to tender evidence in Melbourne within the limits of the statements tendered during the previous week, but rejected by his Honor owing to a portion of their contents.

It was arranged that the Court should sit in Melbourne on February 15.

## INDUSTRIAL COURT.

(Before Judge Scholes.)

## WESTERN COLLIERIES BOARD.

His Honor intimated that he would accept the chairmanship of the Western Collieries and Sh

ON THE LAND.  
FARM AND STATION.  
AGRICULTURE IN DENMARK.  
BENEFITS OF TESTING.  
THE "CONTROL" SOCIETY SYSTEM.  
(BY OUR SPECIAL REPRESENTATIVE.)  
VIII.

One of the most valuable effects of the co-operative movement is the "control" society system—an organization whereby the farmer is relieved of all the worry of milk-testing and bookkeeping, and receives valuable advice on the feeding of his stock. "Control" societies are institutions separate from the butter factories, but they are open to any farmer who may wish to join. A farmer may be a shareholder in a co-operative creamery in a certain district, but there is no obligation upon him to subscribe to and be bound by the rules of the "control" society operating over the same area, and in the same manner membership of one of these newer organizations does not necessarily impose financial interest in a creamery. But as a matter of fact the "control" societies are mainly recruiting their members from the ranks of the co-operatives, and it is only a matter of a few years before the two will be governed from one centre. The societies are the outcome of a meeting of members of the local Cattle Breeding Association, held at Vejle in 1895, to discuss the wisdom of organization for the purpose of ascertaining and possibly increasing the productivity of their dairy herds. Until this movement was projected cow-testing was generally regarded as an utter impracticability, and was viewed in much the same light as most advances and reforms are first received. The idea of ascertaining the quality of the milk of every cow in the herd, and of measuring the individual yield of each milking, was ridiculed as a piece of theoretical nonsense, much as it is in Australia at the present time, and the half-dumb farmers, who first discussed the question received very little sympathy and still less support from their neighbours. Nevertheless, the system which they then framed is the basis of the existing rules of regulation of an association which now contains more than 20,000 members, who own in the aggregate considerably more than 200,000 cows. That the advantages are not imaginary, and that the idea is not altogether a theoretical one, is evident from the rapid growth the societies have made. The same year that the first meeting was held at Vejle another meeting was held in another part of the country, and the two societies were registered within a few months of each other. They combined, or, rather, they adopted similar rules, and as far as possible worked together, and thus the work with a membership of 47. Three years later there were 108 of these associations dotted about Denmark, which then claimed a membership of 1444, while the number of cows was 46,000. After a further interval of four years there were 267 associations, 1290 members, and 142,284 cows.

**BENEFITS FOR SMALL FARMERS.**  
No amount of argument can alter the figures. They are definite and convincing. An association such as this, which has a membership of 20,000, and a capital of 1,000,000 kroner, is need for it, and farmers, whether in Denmark or in any other part of the world, do not accord their support to a movement until they see that material advantages are to be obtained. The manner in which the movement has been hastened to join in a good enough evidence of its practical value. The desire for definite information was first aroused by the high price of foodstuffs, the margin between profit and loss being so narrow that unless a cow was a heavy milker or gave milk rich in butter fat she was scarcely worth keeping in the herd. In many cases there was not a satisfactory margin of profit on the capital invested and labour expended, and the farmers realized that in order to increase the productivity of their herds it would be absolutely necessary to ascertain the yield of the individual cows, as well as learn the quantity and cost of the feed consumed by each. For one man to have attempted such an undertaking would have been ruinous or impracticable, but on the co-operative principle the cost to the individual farmer was calculated to be comparatively slight, and quite within reach of the smallest farmer. By securing small monthly contributions from participants in the scheme it was found that the cost to the individual farmer was calculated to be comparatively slight, and quite within reach of the smallest farmer. By securing small monthly contributions from participants in the scheme it was found that the cost to the individual farmer was calculated to be comparatively slight, and quite within reach of the smallest farmer.

**ITEMS.**  
Sultana and current vineyards at Renmark are estimated to be worth £80 per acre. Recently 10 acres changed hands for £800.  
It is declared that in Victoria for every man who wants to secure an irrigation farm there are 10 who are prepared to shoulder the responsibilities of a holding in the Mallee.  
Arrangements are being made for the accommodation of a herd of Abyssinians at Glen Innes State Farm. The dairying industry is extending on the tableland country.

**BREEDING MANAGEMENT.**  
The average yield of a Danish cow is over 600 gallons a year, while an Australian cow yields just a fraction over 300 gallons. But the result of testing—it is the outcome of good breeding and intelligent management. It is as a guide to breeding that the need is invaluable. Cow-testing associations have been going to exert a good influence. The best milking cow in the world will not yield heavily unless it is well fed, and so good feed must precede testing. The benefits of testing is to be estimated. The benefits of testing is to be estimated. The benefits of testing is to be estimated.

RULES OF TESTING SOCIETIES.  
1. The object of the association is to provide a system of cow-testing which will produce a large quantity of milk rich in butter fat.  
(2) The association to be formed in a certain district for a period of five years, and during that time no member can withdraw except by removal from the district.  
(3) The membership of the association is for the present limited to 15 or 18, who will agree and undertake to have their milk from the individual cows in their entire herds weighed and tested once every two weeks.  
(4) The working expenses of the association is to be charged to members in amounts proportionate to the number of samples tested, and such amounts are to be collected semi-annually by the president of the association.  
(5) The association shall elect a board of management consisting of three members, one of whom shall retire each third year. The retirement shall be by draw.  
(6) The board shall elect a president, who shall also act as manager and treasurer. (7) The board of management shall on behalf of the association engage an expert assistant to attend to the sampling and testing of the milk from the individual cows owned by members of the association. The assistant shall also keep a correct and complete account of the milk consumed by each cow, and the quantity of feed consumed by each cow. He shall also prepare statements showing the comparative results from the different herds and individual animals of each, in order that a selection may be made of the animals which would appear to be specially valuable for breeding purposes. (8) Each member of the association shall have one vote, to be given in person or by lawful proxy. (9) At the annual general meeting no less than one-half of the membership shall be required to form a quorum. Should there be no quorum, a special general meeting may be called for not less than two weeks thereafter, and at such meeting any matter may be dealt with by a majority vote. (10) At any meeting all questions shall be determined by a majority vote. (11) The association can be dissolved only by a resolution passed at a general meeting. In the event of the association being dissolved, the members of the association pay their assistant a stated salary per year, and furnish him with room and board during his periodical visits, and also cover him with his regular expenses on his route. The assistant devotes his whole time to the work of the association. When a record association has been formed an assistant is engaged to carry out the practical details of the work. He is supplied with a complete sampling and milk testing equipment, he makes periodical visits to the farm of each member of the association, the frequency of his visits depending on the number of cows in the herd. In the matter of cases each farm is visited once every two weeks, and the day's milk from each cow is carefully weighed, and afterwards sampled and tested by the assistant, who makes the record of the milk and butter-fat yield, but also of the quantities of feed consumed by each cow since his last visit. The farmer keeps a record of the latter from day to day as nearly as he can, and as accurately as possible. A uniform system of bookkeeping has been adopted by nearly all these associations.

**PROFITABLE WHEAT GROWING.**  
**IMPORTANCE OF FALLOWING.**  
Too much cannot be said as to the necessity for fallowing as a means of increasing the yield of wheat. Our special representative in his tour through the wheat belt has constantly drawn attention to this important feature in wheat-farming, and the Government Wheat Commission has been equally insistent on the point. Mr. Trivett remarks that no season has ever furnished such an object-lesson as the benefits to be derived from a proper rotation of fallowing, and intelligent working of the land.  
Mr. Victor Green writes to us, with the view of pressing upon the farmers the paramount importance of more attention being given to thorough fallowing. He says: "I was greatly pleased to find that in your general remarks on the wheat harvest so much space was devoted to pointing out the value of fallowing, and you will be doing really enormous service to the farmers and incidentally to the nation, if you can get the wheat growers to the growers on this matter of cultivation."  
The no previous season has there been such a striking object-lesson as to the value of up-to-date methods, and to a business man it is inconceivable that there should be any farmer who would not be doing really enormous service to the farmers and incidentally to the nation, if you can get the wheat growers to the growers on this matter of cultivation."

**THE WHEAT CROPS.**  
**CUMNOCK EXPERIMENT PLOTS.**  
CUMNOCK.—Mr. Mark Reynolds made his last visit of inspection as agricultural inspector to the Cumnock experiment plots. He was accompanied by Mr. B. H. Reynolds, who is in charge of the plots. The plots are situated on the Cumnock farm, in the parish of Cumnock, Co. Wick. The plots are of various sizes, and are used for the purpose of testing the value of different varieties of wheat, and of different methods of cultivation. The results of the experiments are of great value to the farmers of the district, and are of great interest to the public.

**GOOD YIELDS AT GURRIE.**  
DURBO.—A westerly gale blew on Tuesday, and it will be much of the same weather in the Gurrie district. The crops are doing well, and the farmers are expecting a good yield. The weather is much of the same as in the Gurrie district, and the crops are doing well. The farmers are expecting a good yield.

**GOVERNMENT RESERVES.**  
**MR. BERRY'S POLICY.**  
ALBURY.—Speaking on Tuesday night at Culcairn, Mr. G. S. Berry, Minister for Lands, referred to the question of uncultivated Crown lands. While travelling through this portion of Victoria from Urana to Albury he was struck by the suitability to wheat culture, and its capability to carry a large population in a comparatively small area. He was determined to deal with the question of reserves on a practical basis, especially as the land was so close settled, and the reserves were required for the purpose of settlement. On the Crown land settlement scheme he had found that the settlers were very much handicapped by the neglected condition of the reserves, which were overgrown with rubbish and weeds. He was determined to throw open these Crown lands, which were often blocked by the Forestry Department, which was not in favour of the settlement. It was appalling that settlement was retarded by the neglect of the Crown land policy. The Crown land policy was to be revised, and the areas of land locked up for purposes of timber and game were to be thrown open for settlement. He was determined to deal with the question of reserves on a practical basis, especially as the land was so close settled, and the reserves were required for the purpose of settlement.

FARMERS AND SETTLERS' ASSOCIATION.  
P.P. BOARDS.

**FORBES.**—Mr. Joseph Elliott, of Grove Hill, has been elected president of the Forbes branch of the Farmers and Settlers' Association, in lieu of Mr. Chas. Burton, resigned. A resolution was carried at the meeting asking the Pasture Protection Board to make investigation as to the quality and strength of certain phosphoric preparations that were being offered for sale as rabbit poisons. It was pointed out that it takes two to four months to breed a rabbit, and that a rabbit poison that was effective as that supplied some years ago. The board, at a meeting subsequently held, directed a reply to be sent intimating that it had no jurisdiction in the matter.  
**P.P. BOARDS.**  
**FORBES.**—At a meeting of the Pasture Protection Board the stock inspector (Mr. Devlin) submitted samples of the blue cross (Crotchet) sheep, and the board is ascertained a large quantity of prussic acid, which was used to poison the sheep. The board is ascertained a large quantity of prussic acid, which was used to poison the sheep. The board is ascertained a large quantity of prussic acid, which was used to poison the sheep.

**LOSS AMONG SHEEP.**  
**GUNDAGAI.**—A large mob of sheep owned by Mr. H. F. Lampe, of Tabbagba, camped on Gundagai flat, but a few hours afterwards 128 of the flock were dead. The mortality is believed to be due to eating young thistles.  
**BUTTER TRADE.**  
**VALUE OF DISTINCTIVE BRANDS.**  
BRIENNE.—Some important aspects of the trade in dairy produce were discussed on Wednesday last by the representatives of the Agent-General and representatives of the co-operative dairy companies. The Agent-General said that the dairy companies had their own recognised brands, and to hold their trade they had necessarily to keep their standards up to a certain standard. The Agent-General also pointed out the need for Australia factories to each have several distinctive brands, under which butters of varying grades could be packed.

**MORTALITY AMONGST BROOD MAHES.**  
**WINGHAM.**—The mortality amongst mares in the Upper Manning district has been abnormally high this season, and owners are looking for a solution of the problem. The excessive heat experienced a week or so ago is probably somewhat responsible.  
**DAIRYING.**  
**GUNDAGAI.**—The largest cheque earned by a supplier to the Gundagai factory for the month just concluded amounted to £183. The proposal to form a herd-testing association has not yet been met with the support of dairymen, who say they are able to do their own testing.

**DISTRICT ITEMS.**  
**BLACKTOWN.**—The bolterous westerly wind of Tuesday night set on a matter of crops, and fruit. Orchards in open and unprotected situations suffered considerably. Green plums, and even pears, were blown from the branches, while ripe fruit fell by the score. Paspalum grass is now well on in seed. Wherever there is damp situations there is now beautiful growth.  
**CENTRAL TILBA.**—At a meeting of the Pasture Protection Board the following were appointed provisional directors: Messrs. A. A. Byrne (Chairman), G. W. Mitchell (Secretary), and J. W. Taylor (Treasurer). The board has decided to co-operate with the Jerilderie board in a movement to have sheep-dipping made compulsory in order to combat the blow-fly pest, the ravages of which were becoming alarming.  
**POBET REEKS.**—A further heavy downpour of rain occurred on Saturday morning, registering 102 points. It was accompanied by a strong wind, and the result was a subsoil in places to 18 in. deep, taking the tubers just planted some distance from the surface. The potatoes were in good condition.
